MISDEMEANOR BILL CONTAINS A "JOKER"

Governor Will Veto Measure That Would Have Released Certain Offenders.

ANNAPOLIS, Md., April 12.—The "joker" of the session of the Maryland Legislature for 1910 has developed in a bill which if signed would most certainly have the effect of barring the prosecutions of William F. Downs, the clerk in the office of the collector of Baltimore city, who is charged with wholesale peculations, and of George T. Gambrell, who is charged with the multiplication of loans upon the same whisky in bond.

The bill was introduced by Senator Sprosser of Baltimore city, and whether designed to have the effect mentioned or not, it is regarded as a dangerous bill by Attorney General Straus and it will be vetoed by the governor upon his suggestion.

At present misdemeanors not punishable by a term in the penitentiary are abated within one year after the commission of the offense unless indictment has been found.

The bill does away with the exception and bars all misdemeanors after one year. This would apply to the Downes and Gambrell cases exactly.

MARLBORO ROAD IN GOOD SHAPE

Party of Motorists Make Inspection of Maryland Stretch.

By HARRY WARD.

Washington motorists are not generally aware of the fact that the road to Upper Marlboro has lately been improved and is now one of the best highways leading out of this city.

The road has been macadamized for the greater part of the way, and the few stretches of dirt road that remain will be improved within the next few weeks. This road is part of the general scheme of road improvement undertaken by the Maryland state road commission, and it affords the motorists of Washington an attractive touring ground, as there are few hills, while the scenic and historic features of the route make it one of the most interesting routes out of the city.

The trip to Upper Marlboro was made yesterday by a party of motorists, who were the guests of Robert J. Callahan, Jr., in his big seven-passenger American-Simplex touring car. In the party were T. J. Downing, an attractive young man, and J. A. Taylor, the club of Washington; J. A. Taylor, the Times representative, E. J. Drake, and a musician.

Aside from a blowout and the collapse of a rear wheel of the machine, which necessitated calling for assistance from town, the tourists report having had a most delightful trip. Mr. Callahan is enthusiastic over the Upper Marlboro route, which he regards as one of the best in this section. "It is surprising," said he, "that this fine road is not more extensively used by the motorists of Washington. I suppose it is due to the fact that they are not aware that the road has been vastly improved within the last year. To any motorist who wishes a delightful (and free) ride I can recommend the trip to Upper Marlboro and return."

It is refreshing to know that the medical profession has found something good in the automobile. At Philadelphia, recently, Dr. James Tyson declared that automobilism is one of the best forms of exercise, and will tend to strengthen the heart quicker than anything else. This is, of course, true, provided that the patient is not timid or of an extremely nervous temperament. In this case, the heart is easily stimulated without undue exertion.

Following the announcement of the purchase of a seven-story building in New York by the United States Motor Company, the organization for the Maxwell and Columbia comes the statement that the huge building located on the upper floor of the building will be used as an indoor demonstrating track. It will be used by the New York branch of the United States Motor Company on rainy and windy days, when outdoor demonstrations are impracticable. This is a decided innovation, and will give the company an opportunity to demonstrate cars every day in the year regardless of weather conditions.

Manager Sibbard, of the Zell Motor Car Company, has been advised that the Chairman of the "24" which has been making daily round trips between Denver and Colorado Springs, ran double-header Tuesday last, and that of last week to make up for lost time in the heavy snow, which made a large part of the route impassable. The average running time was twelve hours and forty-five minutes, with an intermission of forty minutes between runs. The car carried a full load of passengers and made the double run without an adjustment. The car has now made twenty-seven trips in twenty-seven days.

J. A. Taylor, of the Philadelphia branch of the Fisk Rubber Company, was in the city yesterday and visited many friends in the auto trade. Mr. Taylor has recently returned from a trip to the Eastern States of Maryland. "The people in that section are certainly becoming enthusiastic over motoring," said Mr. Taylor. "The little town of Denton, with a population of about 1,500 has thirty-seven automobiles. Eastern has eighty-five machines, while Salisbury has almost as many."

Accompanied by a party of friends, C. Cascard, Schenck, white St. Louis agent, made a trip to Baltimore and return yesterday in a "15-39" Stearns car. The trip was made over the Washington Baltimore boulevard.

Walter S. Ufford, general secretary of the Associated Charities, spoke of the work accomplished by the Recreation branch of the organization with which he is connected. Because of the shortness of time he was not able to give detail, and was invited to make the address before the May meeting of the association.
